

STUDENT ENROLLMENT & COURSE MANAGEMENT SYSTEM

PROJECT DOCUMENTATION

TEAM LEADER: P.Subasri

TEAM MEMBERS: R.Susanna, Thanigaivel, Thamizhselvan

1. ABSTRACT

The Student Enrollment & Course Management System is a simple web-based system used to manage student registration, course details, and course enrollment. It reduces manual work and stores student and course information in a centralized database. Students can register, view available courses, and enroll in courses. Administrators can manage students, courses, and enrollment records.

2. INTRODUCTION

The system is developed to make the student enrollment process simple, fast, and accurate. It provides an easy way to maintain student details and course information and helps administrators manage enrollment records efficiently.

3. OBJECTIVES

- To simplify student registration and enrollment.
- To manage student details efficiently.
- To maintain course information.
- To reduce paperwork and manual errors.
- To provide quick access to enrollment records.
- To improve course management.

4. EXISTING SYSTEM

In the existing manual system, student and course details are maintained using paper forms or separate files. This requires more time and may cause data entry errors, duplication, and difficulty in searching records.

5. PROPOSED SYSTEM

The proposed system computerizes student registration, course management, and enrollment. Students can register and select courses, while administrators can manage student, course, and enrollment information through the system.

6. MODULES

1. Student Registration – Stores student personal and contact details.
2. Student Login – Provides secure access for registered students.
3. Course Management – Allows the administrator to add, update, view, and delete courses.
4. Course Enrollment – Allows students to select and enroll in courses.
5. Enrollment Management – Allows the administrator to view and manage enrollment records.

7. SOFTWARE REQUIREMENTS

Operating System: Windows / Linux

Front End: HTML, CSS, JavaScript

Back End: Python / PHP / Java

Database: MySQL

Browser: Google Chrome / Microsoft Edge

Development Tool: VS Code / PyCharm / Eclipse

8. HARDWARE REQUIREMENTS

Processor: Intel Core i3 or above

RAM: 4 GB or above

Hard Disk: 250 GB or above

Keyboard and Mouse

Monitor

9. DATABASE DESIGN

Student Table: Student_ID, Name, DOB, Gender, Email, Phone, Address, Password.

Course Table: Course_ID, Course_Name, Description, Duration, Credits, Capacity.

Enrollment Table: Enrollment_ID, Student_ID, Course_ID, Enrollment_Date, Status.

10. WORKING PROCESS

Student Registration → Login → View Available Courses → Select Course → Submit Enrollment → Store Enrollment Details → Admin Management.

11. ADVANTAGES

- Easy to use
- Saves time
- Reduces paperwork
- Reduces manual errors
- Centralized data storage
- Easy course enrollment
- Easy record management

12. FUTURE ENHANCEMENTS

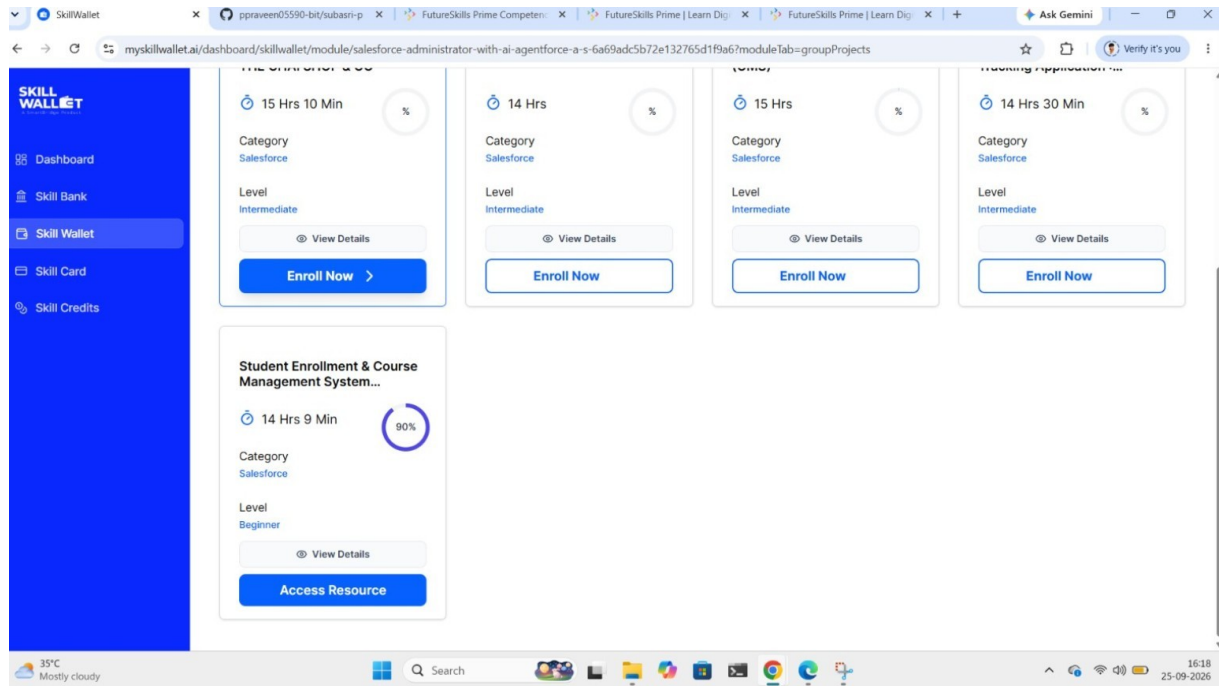

- Online fee payment
- Email/SMS notifications
- Mobile application
- Attendance management
- Online examination
- Certificate generation
- Course recommendation system

13. CONCLUSION

The Student Enrollment & Course Management System provides a simple and efficient way to manage student registration, courses, and enrollment records. It reduces manual work, improves accuracy, and makes the enrollment process easier for both students and administrators.

14. PROJECT SCREENSHOTS

Screenshot 1 – Project Dashboard

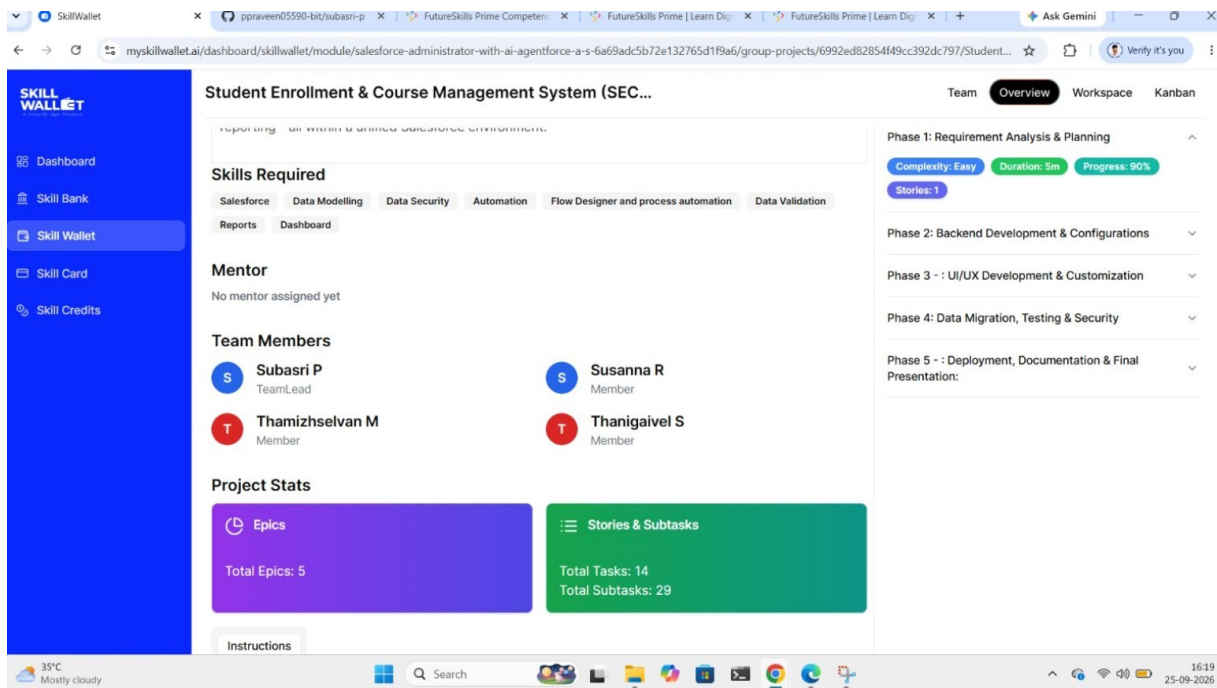

Screenshot 2 – Team Members

The screenshot displays the SkillWallet dashboard for a group project. The left sidebar contains navigation links: Dashboard, Skill Bank, Skill Wallet (selected), Skill Card, and Skill Credits. The main content area is titled "Student Enrollment & Course Management System (SEC..." and includes tabs for Team, Overview, Workspace, and Kanban. A green notification bar states "Your group project is now ready!" with a "Start Group Project" button. Below this, a list of team members is shown, each with a profile card containing their initials, name, email, and a role dropdown menu.

Initials	Name	Email	Role
SP	Subasri P	ppraveen05590@gmail.com	Team Lead
SR	Susanna R	susanna.ruva5@gmail.com	Member
TM	Thamizhselvan M	tamiltamil05084@gmail.com	Member
TS	Thanigaivel S	thanigaivel7762@gmail.com	Member

The bottom of the image shows a Windows taskbar with the date 25-09-2026 and time 16:18.

Screenshot 3 – Project Overview

Screenshot 4 – Workspace and Project Progress

The screenshot displays the Skill Wallet workspace for a project titled "Student Enrollment & Course Management System (SEC...)". The interface is divided into several sections:

- Header:** Shows the user's profile (SP), 0 AI Tokens, and 300 Credits.
- Navigation Sidebar:** Includes links to Dashboard, Skill Bank, Skill Wallet (selected), Skill Card, and Skill Credits.
- Project Details:**
 - Phase 1: Requirement Analysis & Planning** (Epic, Complexity: Easy, Duration: 5m)
 - Description:** Salesforce is your customer success platform, designed to help you sell, service, market, analyze, and connect with your customers. It also mentions managing relationships with prospects and customers, collaborating with employees and partners, and storing data securely in the cloud. A link to a YouTube video is provided: <https://youtu.be/r9EX3IGde5k>.
 - Resources:** No resources available.
- Project Progress Panel:**
 - Project Progress:** 90% complete.
 - View Demo** and **View Repo** buttons.
 - Phase 1: Requirement Analysis & Planning** (90% complete) - Creating Developer Account.
 - Phase 2: Backend Development & Configurations** (90% complete).
 - Phase 3 - : UI/UX Development & Customization** (90% complete).
 - Phase 4: Data Migration, Testing & Security** (90% complete).
 - Phase 5 - : Deployment, Documentation & Final Presentation:** (90% complete).

The bottom of the screen shows a Windows taskbar with the date 25-09-2026 and time 16:19.
